

WAREHOUSE MANAGEMENT SYSTEM (WMS)

About Softeon

Softeon is a WMS provider focused exclusively on optimizing warehouse and fulfillment operations. For over two decades now, we have been helping our customers succeed. Investing in R&D enables us to develop software to solve the most complex warehouse challenges. Softeon is laser-focused on customer results, with a 100% track record of deployment success. We believe warehouse leaders shouldn't have to settle for a one size fits all approach to technology.

Challenge

If you know supply chain operations, then you know the warehouse is the heartbeat of the operation. In today's digital landscape, having a robust and efficient Warehouse Management System (WMS) is essential.

Today's highly complex global supply chains are stressing the limits of warehouse and distribution operations. Demand and supply volatility coupled with changes in customer requirements significantly impact warehouse operations. Compliance requirements are constantly changing. Legacy systems and antiquated processes leave companies unprepared. In the end, the daily effort to meet or exceed customer expectations often leaves little time to improve fulfillment processes.

TRUSTED BY LEADING COMPANIES

“ We see everything in real-time from manufacturing to the end customer. Softeon handles all this data seamlessly and we have 100% visibility throughout the supply chain. We are extremely satisfied with Softeon WMS. ”

– Mike Wiese, System Administrator

– Dietz & Watson

Solution

Softeon WMS gives you the flexibility to keep up with changing business and market conditions. When it comes to optimization, we do more than offer an out-of-the-box solution for the masses. Where other vendors force you into their way of doing things, we offer freedom and tailored precision. Softeon leverages modern capabilities to streamline processes, automate warehouse functions, optimize resources and ensure the timely execution of events.

As the heart of the operation, your WMS needs the ability to quickly integrate with enterprise software applications as well as robotics and material handling equipment. Softeon has extensive support for a variety of automation systems such as pick-to-belt, sortation, pick-to-light, put-to light, automated manifesting. You can also integrate with vendors, suppliers, and other software such as EDI, ERP and financials.

"Micro-tuning" empowers our clients to craft unique workflows perfectly aligned with their business requirements. We provide the perfect fit. Whether you have a single distribution center or a multi-distribution network, this solution can be rapidly configured for your specific requirements to achieve the operational excellence you need.

Companies in nearly every industry trust Softeon WMS with their critical warehouse operations.

Get Started

WAREHOUSE MANAGEMENT SYSTEM (WMS)

Improve Order Fulfillment

Softeon WMS orchestrates planning, replenishes stocks, picks, loads, and ships orders to drive highly efficient order fulfillment operations. The software includes unique functionalities such as order grouping and wave planning, employs multiple advanced picking methodologies, integrates real-time control for order consolidation, and applies highly intelligent and dynamic logic for allocation and replenishment.

Gain Real-time Warehouse Visibility

The powerful graphical tools and user-defined queries enable you to view and manage inventory in real-time, as well as optimize resources and increase productivity.

Integrate and Improve

Softeon WMS offers the industry's most flexible approach to integration with real-time voice functionality, eliminating the need for third-party control software. Softeon provides significant advantages for those companies using advanced material handling systems, such as carton sortation, pick-to-light ASRS, and other technologies.

Increase Inventory Accuracy

The system provides real-time control over all aspects of materials management in your warehouse operations. This includes location management, receiving, quality checking, putaway operations and inventory control. End-to-end tracking of inventory includes integration with RF scanning, voice devices and material handling automation systems.

Enhance Labor Productivity

Tools for optimizing labor and equipment resources enable you to properly plan warehouse resources. A task-based module tracks and manages each warehouse activity to optimize labor resources. Task assignment ensures the right person has the right equipment to get the job done in the best way.

Optimize Space Utilization

Our rules-based engine and graphical tools help you plan warehouse layout and storage strategies for continuous performance improvement. Put fast-moving products in the ideal place with virtual zoning tools to optimize space.

INDUSTRY RECOGNITION

- Softeon was recognized in the 2023 Gartner® Magic Quadrant™ for Warehouse Management Systems Report*.
- Leader in G2 Spring 2024 WMS Grid® Report
- Member of 2024 Inbound Logistics Top 100 Logistics IT Providers
