

Softeon for 3PLs HANDLE ANY CLIENT NEED

Challenge

Softeon helps third-party logistics providers (3PLs) grow by providing them with a warehouse management system (WMS), warehouse execution system (WES), and distributed order management (DOM) system to better manage and coordinate their fulfillment networks.

Softeon WMS provides advanced inventory management, order fulfillment, and logistics features to optimize warehouse operations no matter how complex the client's requirements are.

Softeon WES orchestrates real-time activities within the warehouse across both human labor and material handling equipment as part of our baseline WMS offering, optimizing the movement of goods for enhanced efficiency and productivity.

Softeon WES manages orders across multiple channels and sources them from the appropriate warehouse (including drop shippers, manufacturers, etc.), providing centralized control and visibility while optimizing fulfillment and inventory allocation.

One WMS - Limitless Scalability

Unlike other vendors with an upmarket and down-market version, Softeon only has one version of our WMS, designed to scale with operational complexity. The same instance of the software can run highly automated, complex distribution centers as well as smaller, less complex hubs. Softeon WMS includes a broad range of capabilities, including billing management, labor management, yard management, kitting, and much more. These capabilities are delivered on a single, integrated software platform.

Tailored to Different Clients

The solution offers extensive configurability at the individual client level. It includes a configurator wizard that assists clients in easily defining or replicating systems across different operations, buildings, or even similar clients. Additionally, it supports unlimited, customer-specific rule-sets and workflows within a single site.

Elegant and Efficient UI/UX

A well-designed user interface (UI) and seamless user experience (UX) are more critical than ever. Intuitive and user-friendly systems have become essential for boosting productivity, reducing costs, and simplifying processes. The system is designed with usability in mind – proving that depth of functionality doesn't need to be complicated to use.

INDUSTRY RECOGNITION

Softeon was recognized in the 2025 Gartner® Magic Quadrant™ for Warehouse Management Systems Report*

Best Supply Chain Software 2025 Report

Member of 2025 Inbound Logistics Top 100 Logistics IT Providers
